FEATURE
SPACE

“ Je tenais à vous remercier pour votre invitation. J’ai passé un agréable moment riche en informations et échanges [...]. Votre événementiel est de haute qualité tant dans l’organisation que les sujets évoqués par des intervenants professionnels. ”

Profiler, net-profiler, researcher in behaviour of cybercriminals

“ Belle occasion de networking avec CIL et RSSI et fournisseurs de solutions. Très intéressantes interventions particulièrement Thierry DELVILLE du Ministère de l’intérieur, des retours d’expériences professionnelles et des infos sur la cyberattaque du 13 mai 2017. Merci. Vivement 2018 ! ”

Vice Présidente de l’ADPO

“ Les présentations de chaque utilisateur final étaient variées, intéressantes et complémentaires. Journée enrichissante ! Événement bien organisé, la gestion de la journée est précise et rythmée au vu du nombre de présentations. L’équipe est top et à l’écoute. J’espère revenir l’an prochain. ”

Consultant Sécurité des SI, EDF

Education Seminars

Speakers

Frederic Benichou,
Regional Director, South EMEA
SentinelOne

François Bezar,
Technical Account Manager
Qualys

Xavier Boidart, Group Chief Information
Security Officer
Crédit Agricole Assurances

Jérôme Chapolard, Account Executive
Darktrace

Thierry Delville, Ministerial Delegate
to the Security Industries and the fight
against Cyber Threats
Interior Ministry

Charles Deprez,
Business Development Manager
Flowmon Networks

Ludiwine Fouquer,
LastPass Customer Success Manager
LastPass/LogMeln

Luc Grissonnanche, Senior Sales Engineer
TITUS

Jim Hansen, COO
PhishMe

Pierre Herbelot, Regional Sales Manager
IBM Resilient

René Jaouen, Regional Sales Director
for Southern Europe
Thales e-Security

Ted Julian, VP of Product
Management & Co-founder
IBM Resilient

Michael Kassim,
Technical Account Manager, SEMEA
Qualys

Arnaud Martin,
Group Chief Information Security Officer
Orange

André Mouradian,
Directeur Marketing – EMEA
Wombat Security

Sarah Normant, VP of International Sales
Clearswift

Franck Perillier,
Head of Information Systems Security
Club Med

Thuyen Pham,
Chief Information Security Officer
Groupe Barrière

Ivan Rogissart,
Regional SE Manager, Southern Europe
Zscaler

Arnaud Tanguy,
Global Chief Information Security Officer
AXA Investment Managers

Cédric Thevenet, Deputy Group IT
Infrastructure CISO & ORM
Société Générale

Key themes

Next generation data analytics

Optimize your incident response plan

Securing email and social media

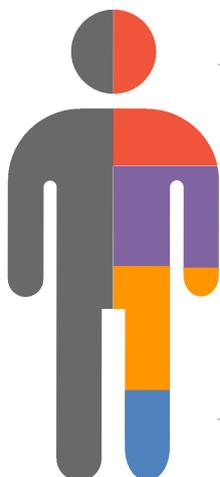

Employee awareness and engagement

Containing the rising costs of security

Securing industrial control systems

Securing enterprise data

Who attended?

Cyber-security

We have a 15-year track record of producing the events cyber-security professionals take seriously

Risk Management

We attract senior risk officers with responsibility for information risk assessment and mitigation

Fraud, Audit, Compliance

We provide the go-to events for fraud prevention and compliance owners at the world's key corporates

Data Protection & privacy

We are a key venue for decision-makers with budget and purchasing authority

Agenda			
08:00	Registration and breakfast reception		
08:50	Conference welcome		
09:00	The state of the digital threat and the action of the Interior Ministry Thierry Delville , Ministerial Delegate to the Security Industries and the fight against Cyber Threats, Interior Ministry <ul style="list-style-type: none"> • Economic and societal issues • The phenomena observed • The main thrusts of the fight against cyber threats 		
09:20	Rapport sur l'état de l'hameçonnage 2017 : Comprendre les comportements des utilisateurs finaux face à l'hameçonnage André Mouradian , Directeur Marketing – EMEA, Wombat Security <p>Malgré la mise en place d'un solide programme de formation et de sensibilisation à la sécurité, les cybercriminels d'aujourd'hui parviennent même à échapper à l'attention des utilisateurs finaux les plus avisés grâce à des attaques d'hameçonnage par courriel planifiées avec soin et qui deviennent de plus en plus avancées.</p> <ul style="list-style-type: none"> • Informez-vous sur la surprenante réalité de la sensibilisation et des comportements des consommateurs en matière de cybersécurité • Écoutez des perspectives directes offertes par des professionnels de la sécurité informatique qui s'expriment sur les vulnérabilités dans leur entreprise et expliquent comment ils se protègent • Informez-vous sur les types de campagnes d'hameçonnage simulées que vous pourriez considérer pour votre entreprise 		
09:40	The Enterprise Immune System: Using machine learning to automate advanced cyber defence Jérôme Chapolard , Account Executive, Darktrace <ul style="list-style-type: none"> • How machine learning and mathematics can automate advanced threat detection within networks • Why self-learning technology, known as the 'immune system' approach, detects threats early without using rules or signatures • How to gain 100% visibility across physical, virtual and cloud environments, including third-party cloud services and SaaS • Real-world examples of unknown threats detected by 'immune system' technology 		
10:00	Securing messages within Orange Group Arnaud Martin , Group Chief Information Security Officer, Orange <ul style="list-style-type: none"> • Securing written communications: A necessity • Internal pki: Global overview • International and subsidiary context: How to ensure secured exchanges • Nomadic context 		
10:20	EDUCATION SEMINAR SESSION 1 <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; padding: 5px;"> Qualys Security as an enabler to digital transformation Michael Kassim, Technical Account Manager, SEMEA, Qualys </td> <td style="width: 50%; padding: 5px;"> Thales e-Security Proactive defence for the digital transformation René Jaouen, Regional Sales Director for Southern Europe, Thales e-Security </td> </tr> </table>	Qualys Security as an enabler to digital transformation Michael Kassim , Technical Account Manager, SEMEA, Qualys	Thales e-Security Proactive defence for the digital transformation René Jaouen , Regional Sales Director for Southern Europe, Thales e-Security
Qualys Security as an enabler to digital transformation Michael Kassim , Technical Account Manager, SEMEA, Qualys	Thales e-Security Proactive defence for the digital transformation René Jaouen , Regional Sales Director for Southern Europe, Thales e-Security		
11:00	Refreshments and networking break		
11:30	The first steps of the SOC: Towards a Security Operational Centre Franck Perillier , Head of Information Systems Security, Club Med <ul style="list-style-type: none"> • Protection is important, but is it enough? • Monitoring security becomes essential • How to get there? 		
11:50	How best to secure access to your enterprise applications Ludiwine Fouquer , LastPass Customer Success Manager, LastPass/LogMeIn <ul style="list-style-type: none"> • How businesses are being forced to adapt new security models as the work environment evolves in the digital era • What's important to consider when choosing how to secure your enterprise applications • Why over 11 million people globally trust LastPass 		
12:10	Collective security – Prairie Dogs vs Humans Jim Hansen , COO, PhishMe <p>As the security industry has continued to under invest in the human element of security, phishing has become the top attack vector for cybercriminals.</p> <ul style="list-style-type: none"> • Why the cybersecurity industry is broken • How to reduce susceptibility to human-targeted attacks • How to empower users to become human sensors to recognise and report suspected attacks 		

Agenda			
12:30	<p>The ultimate end-point security challenge: Prevention, Detection, Response & Remediation in a single unified platform</p> <p>Frederic Benichou, Regional Director, South EMEA, SentinelOne</p> <ul style="list-style-type: none"> • Why has the end-point emerged as the ultimate security challenge? • How is it possible to stop or mitigate all types of attacks on the end-point, in real time? • Why is it important to perform all pre-execution, on-execution and post-execution functions, in a single platform? And still get a 360° visibility on the threats that have happened 		
12:50	<p>EDUCATION SEMINAR SESSION 2</p> <table border="0"> <tr> <td> <p>Flowmon Networks Good data (won't) leads to good decisions Charles Deprez, Business Development Manager, Flowmon Networks</p> </td> <td> <p>TITUS Be the good guy. Safeguard your information to protect your customers and your reputation Luc Grissonanche, Senior Sales Engineer, TITUS</p> </td> </tr> </table>	<p>Flowmon Networks Good data (won't) leads to good decisions Charles Deprez, Business Development Manager, Flowmon Networks</p>	<p>TITUS Be the good guy. Safeguard your information to protect your customers and your reputation Luc Grissonanche, Senior Sales Engineer, TITUS</p>
<p>Flowmon Networks Good data (won't) leads to good decisions Charles Deprez, Business Development Manager, Flowmon Networks</p>	<p>TITUS Be the good guy. Safeguard your information to protect your customers and your reputation Luc Grissonanche, Senior Sales Engineer, TITUS</p>		
13:30	Lunch and networking		
14:30	<p>How can we rethink information security during the digital transformation?</p> <p>Arnaud Tanguy, Global Chief Information Security Officer, AXA Investment Managers</p> <p>For the past few years, the Information Security Managers have been confronted with a major digital upheaval: 'digitisation' of business lines and ISD, 'de-imperimetrisation' of the information system, innovation and emergence of 'cybertech' of attacking cyber attackers.</p> <ul style="list-style-type: none"> • How can we retain the hard-won trust of the board, the trades and the information systems? • How to accompany and promote the digital acceleration and agility required by CIOs and trades? • How can we foster a culture of innovation serving the protection of information? 		
14:50	<p>The role of technology in incident response</p> <p>Ted Julian, VP of Product Management & Co-Founder, IBM Resilient</p> <ul style="list-style-type: none"> • The evolution of the incident response market, and the role it plays in improving cyber resilience • What's the difference between security automation and orchestration and how both can be leveraged • How organisations can develop their incident response strategies to reduce the impact of cyber attacks 		
15:10	<p>Cloud, mobility, digital transformation: What are the impacts on IT and security ?</p> <p>Ivan Rogissart, Regional SE Manager, Southern Europe, Zscaler</p> <ul style="list-style-type: none"> • Cloud and mobility, key enabler of digital transformation, create new needs and uses in the enterprise • Integrate and use new applications become simpler and faster, no matter where the users are: at headquarters, at a branch office, or on the road • What are the impacts on IT and Security? 		
15:30	<p>EDUCATION SEMINAR SESSION 3</p> <table border="0"> <tr> <td> <p>Clearswift How security tools can effectively address ransomware threats and GDPR data discovery Sarah Normant, VP of International Sales, Clearswift</p> </td> <td> <p>Qualys Overwhelmed by vulnerabilities? Keep calm and prioritise with Qualys François Bezar, Technical Account Manager, Qualys</p> </td> </tr> </table>	<p>Clearswift How security tools can effectively address ransomware threats and GDPR data discovery Sarah Normant, VP of International Sales, Clearswift</p>	<p>Qualys Overwhelmed by vulnerabilities? Keep calm and prioritise with Qualys François Bezar, Technical Account Manager, Qualys</p>
<p>Clearswift How security tools can effectively address ransomware threats and GDPR data discovery Sarah Normant, VP of International Sales, Clearswift</p>	<p>Qualys Overwhelmed by vulnerabilities? Keep calm and prioritise with Qualys François Bezar, Technical Account Manager, Qualys</p>		
16:10	Refreshments and networking break		
16:30	<p>Cybersecurity: The right awareness campaign for the right people</p> <p>Xavier Boidart, Group Chief Information Security Officer, Crédit Agricole Assurances</p> <p>In his presentation, Xavier Boidart will address the following points, based on concrete examples of communications, awareness campaigns or cybersecurity training deployed at Crédit Agricole Assurances, or more generally within the Crédit Agricole Group:</p> <ul style="list-style-type: none"> • Responsibility of the CISO for information security sensitisation • Who is raising awareness, and how? • Should we be using the same methods for information systems users, and the IT specialists who manage them? • Should we train our clients and partners, and if so, how? • Can we go so far as to raise awareness among our future hires, or even ... our future clients? 		
16:50	<p>EXECUTIVE PANEL DISCUSSION How to find the right balance between cybersecurity risk and its increasing cost</p> <p>Thuyen Pham, Chief Information Security Officer, Groupe Barrière Cédric Thevenet, Deputy Group IT Infrastructure CISO & ORM, Société Générale Pierre Herbelot, Regional Sales Manager, IBM Resilient</p>		
17:10	Closing remarks		

Education Seminars	
<p>Clearswift</p> <p>How security tools can effectively address ransomware threats and GDPR data discovery</p> <p>Sarah Normant, VP of International Sales, Clearswift</p>	<p>Today's security platforms are relying on signature-based or sandbox technologies to detect the ever changing ransomware threat. This approach is still fallible with 'virtual aware' threats and 'time-based' threats going undetected. See how an award winning 'game changing' technology can protect organisations whilst allowing business communication.</p> <p>Introducing Adaptive Redaction technology that meets business requirements from stopping security threats as well as visible and invisible data leaking from the organisation's network. This new technology bridges the gap between business requirements and IT requirements to secure the network.</p> <p>GDPR is a real challenge for businesses today. There is no 'silver bullet' to address the total GDPR regulation. Much has been discussed around the fines, but not much has been discussed around what is actually needed to be done. This talk will cover the practical approach to content aware data discovery to answering the key questions: What? Where? How? And Who?</p> <p>What attendees will learn:</p> <ul style="list-style-type: none"> • How Clearswift can integrate with existing solutions to add Adaptive Redaction • How Adaptive Redaction addresses real business issues from security to visible and invisible data leakage • How the Clearswift's platform can implement a data discovery across multiple boundaries both external and internal
<p>Flowmon Networks</p> <p>Good data (won't) leads to good decisions</p> <p>Charles Deprez, Business Development Manager, Flowmon Networks</p>	<p>But it will depend on your way of consuming data: in a hurry or peacefully? Reactive model or trial by error is the pragmatic model of management mainly observed in organisations because actions and costs implied are immediately opposable to a visible emergency understandable by decision makers.</p> <p>In this assumed firefighter mode what costs the most is time spent to understand what's happening and its proper reaction.</p> <p>When the very nature of threats tends to be covert (APT, social engineering), deceptive (phishing, bots, DDoS) and brutal (cryptoware, Dos) panic and risk management only has to be opposed by looking for equilibrium in all things starting with enlightened visibility.</p> <p>What attendees will learn:</p> <ul style="list-style-type: none"> • See what flow shows and predict the future • Replay essential live feeds as if you were there • Win faster and more often the hot potato game
<p>Qualys</p> <p>Security as an enabler to digital transformation</p> <p>Michael Kassim, Technical Account Manager, SEMEA, Qualys</p>	<p>By the end of 2017, 90% of the CEOs of the European FT500 enterprises will have digital transformation at the centre of their corporate strategy (IDC 2016 source).</p> <p>Digital transformation is now a reality! With the pressures and priorities of business departments sometimes in opposition with IT constraints, how can the CIO drive digital transformation and become the major actor of digital transformation?</p> <p>What attendees will learn:</p> <ul style="list-style-type: none"> • How security and compliance can become real assets regarding the business • How do organisations gain visibility and insight into their environments? • How have Qualys supported customers to take on the challenge of shadow IT?

Education Seminars	
<p>Qualys</p> <p>Overwhelmed by vulnerabilities? Keep calm and prioritise with Qualys</p> <p>François Bezard, Technical Account Manager, Qualys</p>	<p>Finding vulnerabilities, compliance exceptions or web application risks in any organisation is easy; making them go away is a much more difficult task. While the theoretical 'Fix-It' button may be stuck in the up position, we will share real experiences of how to lubricate the workflow of risk mitigation with the people, process and technology conundrum.</p> <p>What attendees will learn:</p> <ul style="list-style-type: none"> • Gain full visibility and control of all IT assets to effectively ensure security and compliance • Automatically prioritise the vulnerabilities that pose the greatest risk to your organisation • Measure your progress and remediation efforts with real-time trend analysis
<p>Thales e-Security</p> <p>Proactive defence for the digital transformation</p> <p>René Jaouen, Regional Sales Director for Southern Europe, Thales e-Security</p>	<p>As organisations set out on their path to digital transformation, there can be no denying that more and more services will be brought online and moved into the cloud – from tax returns to healthcare records – making a faster, more agile and open service for consumers and enterprises.</p> <p>However, such transformation is happening within an increasingly precarious environment – one in which data breaches are at an all-time high and incidents of identity theft have risen by 57% in a single year. Data is the prize for these hackers and, as more services are moved into the cloud, the concern for many citizens will be around their valuable, personal data falling into the hands of those with malicious intent. With the rise of cloud and the Internet of Things, it's evident the threat of attack has moved from the perimeter to within an organisation's walls, and consequently measures need to be put in place to take control of data – regardless of where it resides.</p> <p>Join René Jaouen, Regional Sales Director for Southern Europe at Thales e-Security, for an interactive and informative discussion.</p> <p>What attendees will learn:</p> <ul style="list-style-type: none"> • What are key considerations when engaging on a digital transformation strategy? • Why organisations should take a proactive data defence strategy when it comes to digital transformation • The benefits of maximising the level of control over data irrespective of where it is created, stored or shared
<p>TITUS</p> <p>Be the good guy. Safeguard your information to protect your customers and your reputation</p> <p>Luc Grissonnanche, Senior Sales Engineer, TITUS</p>	<p>As 'digital transformation' is increasing the velocity of information sharing, organisations require a corresponding shift in employee attitude towards data security.</p> <p>Insiders pose as large a threat to data security as external hackers. Responsibility for data security must shift from the IT department to every worker. To create a culture of security and safeguard data, organisations must begin by clearing identifying the value of data.</p> <p>What attendees will learn:</p> <ul style="list-style-type: none"> • How to accurately identify the sensitivity and value of corporate information • Prevent inadvertent data leaks and detect insider threats • Create policies and metrics that matter • Establish a culture of security and privacy throughout your organisation <p>This education seminar will be run in French.</p>
