

# Post event report

The 13<sup>th</sup> e-Crime & Cybersecurity  
Germany

18<sup>th</sup> June 2019 | Munich, Germany

## Strategic Sponsors

Inside this report:  
Sponsors  
Key themes  
Who attended?  
Speakers  
Agenda

### Key themes

Getting the basics right

The nature of nation state actors

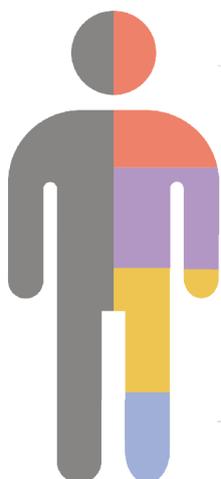

Cyber risk identification, measurement and management

Cost-effective compliance

Securing specialised systems

AI: separating the hype from the reality

### Who attended?

#### Cyber-security

We have a 15-year track record of producing the events cyber-security professionals take seriously

#### Risk Management

We attract senior risk officers with responsibility for information risk assessment and mitigation

#### Fraud, Audit, Compliance

We provide the go-to events for fraud prevention and compliance owners at the world's key corporates

#### Data Protection & privacy

We are a key venue for decision-makers with budget and purchasing authority

### Speakers

David Anumudu, CISSP, CSSLP, CISM, Solution Architect, **Flashpoint**

Henrik Becker, Director Compliance & Risk Management, **Unitymedia Kabel**

Frank Borchard, Head of IT, **Otto Group**

Stefan Bosnjakovic, IAM & GRC Architect, **Deutsche Kredit Bank**

Ruben Caris, Anti Financial Crime, **HypoVereinsbank – UniCredit Bank AG**

Jake Curtis, Information Security Officer, **BurdaForward**

Wolfgang Fricker, IT Compliance Manager, **Lotto24**

Georg Gann, Regional Sales Director DACH & Eastern Europe, **Venafi**

Nathan Howe, Principal Solution Architect, **Zscaler**

Jirko Kaeding, Account Executive – DACH Region, **BitSight**

Christoph Kumpa, Director DACH & EE Region, **Digital Guardian**

Heiko Löhr, Head of Section Cybercrime Unit, **German Federal Criminal Police Office**

Georg Mattern, Information Security Officer, **Siemens**

Marcus Mueller, VP of Enterprise Sales EMEA, **OneLogin**

Jakob Oberascher, Senior Sales Engineer DACH and Eastern Europe, **Digital Guardian**

Ron Peeters, Managing Director EMEA, **Synack**

Marek Pietrzyk, Director and Program Manager, **UBS Switzerland**

Andy Renshaw, Senior Director – Market Planning – Fraud and Identity, **ThreatMetrix**

Dr. Christoph Ritzer, Partner, **Norton Rose Fulbright**

Daniel Sandmann, Attorney at Law, Senior Lecturer at **University of Augsburg and ICN Business School Nancy/Berlin**

Tobias Schubert, Enterprise Sales Engineer DACH, **CrowdStrike**

Peter van Zeist, Sr. Solutions Consultant, **LogMeln**

Agenda	
08:00	Breakfast networking and registration
08:50	Chairman's welcome
09:00	<b>How to manage the evolution of regulatory risk</b> <b>Felix Czwikla</b> , DPO, GlaxoSmithKline Consumer Healthcare <ul style="list-style-type: none"> <li>• Adaptations since GDPR and lessons learnt</li> <li>• How does GSK manage regulatory risks and resulting incident response models?</li> <li>• How has the prioritisation of data privacy shifted and what does this mean for future security roles?</li> </ul>
09:20	<b>Harnessing the power of a digital identity network: reducing e-crime, building trust</b> <b>Andy Renshaw</b> , Senior Director – Market Planning – Fraud and Identity, ThreatMetrix <ul style="list-style-type: none"> <li>• How harnessing a global view of trust, and risk, helps detect and block advanced fraud</li> <li>• Building trust using digital identity intelligence can help better distinguish between good customers and fraudsters in near real time</li> <li>• An analysis of recent attack patterns and fraud typologies from the ThreatMetrix Digital Identity Network, which analyses 110 million transactions a day</li> </ul>
09:40	<b>Implementing a compliance and governance control framework within the business</b> <b>Stefan Bosnjakovic</b> , IAM & GRC Architect, Deutsche Kredit Bank <ul style="list-style-type: none"> <li>• Affording the appropriate members of the business the correct level and scope of access</li> <li>• How to manage intertwined business processes and IT while conforming to ever increasing compliance standards</li> <li>• Shedding light on the compliant implementation of segregation of duties</li> </ul>
10:00	<b>Machine Identity Protection – the next hot category in IT security</b> <b>Georg Gann</b> , Regional Sales Director DACH & Eastern Europe, Venafi <ul style="list-style-type: none"> <li>• What are machines?</li> <li>• What are Machine Identities?</li> <li>• Day-to-day challenges to overcome around Machine Identities</li> <li>• How to gain Visibility, Intelligence and Automation to protect your Machine Identities</li> </ul>
10:20	Networking and refreshments break
10:50	<b>EXECUTIVE PANEL DISCUSSION</b> <b>Demystifying cyber-threats with law enforcement</b> <b>Heiko Löhr</b> , Head of Cybercrime from the German Federal Police (BKA) <b>Ruben Caris</b> , Anti Financial Crime, HypoVereinsbank – UniCredit Bank AG <b>Patricia Andre</b> , Business Continuity Manager, Allianz
11:10	<b>Your users don't care about the network, so why try and push them there?</b> <b>Nathan Howe</b> , Principal Solution Architect, Zscaler <ul style="list-style-type: none"> <li>• Secure application access for your users regardless the location of the app or the user</li> <li>• Decoupling your users from your applications and networks</li> <li>• Your apps exist everywhere, on prep and the cloud, etc. therefore the internet has already become part of the company</li> <li>• Elimination of the need for network-centric solutions such as remote access VPN</li> </ul>
11:30	<b>How to manage cyber-risk on a daily basis for your company and the affiliates, your suppliers and peers (Live view in the BitSight Portal)</b> <b>Jirko Kaeding</b> , Account Executive – DACH Region, BitSight Participants will see a live view into the BitSight Portal. We will demonstrate how continuous cyber-risk monitoring works for your company and the affiliates, your suppliers and peers. <ul style="list-style-type: none"> <li>• How the cyber-risk rating can be improved in the easiest way. All risk vectors and the results will be demonstrated</li> <li>• How cyber-risk for your own company and its affiliates, suppliers and peers can be managed based on qualified events and ratings</li> </ul>
11:50	<b>Enterprise password management and reporting – best practice</b> <b>Peter van Zeist</b> , Sr. Solutions Consultant, LogMeln Besides multi-factor authentication, single sign-on and biometric data, passwords are still the most common form of authentication. In our session we will talk about how: <ul style="list-style-type: none"> <li>• Organisations are better able to reconcile the needs of IT departments and users</li> <li>• Companies can counteract bad password habits</li> <li>• LastPass makes companies more secure in an unconventional way</li> <li>• You enable your employees to do the same without much effort</li> <li>• You'll be safer in five steps</li> </ul>
12:10	Networking and refreshments break
12:30	<b>Protecting yourself inside out</b> <b>Jake Curtis</b> , Information Security Officer, BurdaForward <ul style="list-style-type: none"> <li>• The human risk factor: are your employees aware they are being targeted?</li> <li>• How do you adequately sensitise employees to these risks?</li> <li>• Password management and multi-factor authentication for overall safety</li> </ul>

## Agenda

<b>12:50</b>	<b>Cyber investigations in fast mode</b>
	<p><b>Tobias Schubert</b>, Enterprise Sales Engineer DACH, CrowdStrike</p> <ul style="list-style-type: none"> <li>• How to achieve automated investigation TODAY</li> <li>• How to apply intelligence and cutting-edge technology to incident response</li> <li>• How to turn attacks into an opportunity to improve defence – automatically</li> </ul>
<b>13:10</b>	<b>OneLogin Access Management: leading cloud transformation</b>
	<p><b>Marcus Mueller</b>, VP of Enterprise Sales EMEA, OneLogin</p> <ul style="list-style-type: none"> <li>• The dynamic future: 2025</li> <li>• Evolution across three domains of business</li> <li>• The rise of the dynamic marketplace</li> <li>• Unifying access across the enterprise</li> </ul>
<b>13:30</b>	Lunch and networking
<b>14:20</b>	<b>How AI can improve cyber-defence – building security analytics platform at UBS</b>
	<p><b>Marek Pietrzyk</b>, Director and Program Manager, UBS Switzerland</p> <ul style="list-style-type: none"> <li>• The evolution of critical persisting cyber-threats – impacting the growing attack surface of modern digital business environments</li> <li>• Leveraging AI, big data analytics and machine learning technologies to automate detection of abnormal behaviours of devices, users or networks</li> <li>• Lessons learnt from the successful global implementation from technological, operational and managerial perspectives</li> </ul>
<b>14:50</b>	<b>3 steps to establish a data-centric security framework</b>
	<p><b>Christoph Kumpa</b>, Director DACH &amp; EE Region, Digital Guardian, and  <b>Jakob Oberascher</b>, Senior Sales Engineer DACH and Eastern Europe, Digital Guardian</p> <p>Forrester has created a framework to help security and privacy leaders implement a security strategy focused on the data. Their data security &amp; control framework breaks down the problem into three areas:</p> <ul style="list-style-type: none"> <li>• Defining the data</li> <li>• Dissecting and analysing the data</li> <li>• Defending and protecting the data</li> </ul> <p>During this session, Christoph and Jakob will quickly drill into this framework and suggest how to derive tangible results from its three core disciplines.</p>
<b>15:10</b>	<b>How risk intelligence derived from threat actors can inform software vulnerability management</b>
	<p><b>David Anumudu</b>, CISSP, CSSLP, CISM, Solution Architect, Flashpoint</p> <ul style="list-style-type: none"> <li>• Why managing vulnerabilities represents a huge challenge for enterprises</li> <li>• Triage troubles – what makes prioritisation so difficult?</li> <li>• Techniques your organisation can use to ensure that the most important emerging vulnerabilities are addressed</li> </ul>
<b>15:30</b>	<b>Privacy and cybersecurity – legal framework and case study</b>
	<p><b>Dr. Christoph Ritzer</b>, Partner, Norton Rose Fulbright</p> <ul style="list-style-type: none"> <li>• Legal implications in case of a cyber-incident – how to deal with the incident and comply with the law</li> <li>• Overview on legal and regulatory risk landscape</li> <li>• GDPR aspects and NIS Directive</li> <li>• Cyber-incident response – case study: Legal and regulatory best practices</li> </ul>
<b>15:50</b>	<b>Offensive security testing with a hacker mindset</b>
	<p><b>Ron Peeters</b>, Managing Director EMEA, Synack</p> <ul style="list-style-type: none"> <li>• There is exponential growth in cyber-attacks and attacks are increasingly sophisticated with greater break-in success</li> <li>• Traditional vulnerability scanning and compliance-based penetration testing prove ineffective to detect many serious vulnerabilities in live systems</li> <li>• Hear about a revolutionary new security testing approach using large teams of highly vetted international, top-class security researchers who can find serious vulnerabilities in any live system often within a matter of hours</li> <li>• Several supporting case studies are discussed including how Synack was able to break in the Pentagon within just four hours</li> </ul>
<b>16:10</b>	Networking and refreshments break
<b>16:30</b>	<b>EXECUTIVE PANEL DISCUSSION Security and business synergy – aligning cybersecurity with organisational goals</b>
	<p><b>Henrik Becker</b>, Director Compliance &amp; Risk Management, Unitymedia Kabel  <b>Frank Borchard</b>, Head of IT, Otto Group  <b>Georg Mattern</b>, Information Security Officer, Siemens  <b>Wolfgang Fricker</b>, IT Compliance Manager, Lotto24</p>
<b>16:50</b>	<b>Compliance and competitiveness; balancing regulation and innovation</b>
	<p><b>Daniel Sandmann</b>, Attorney at Law, Senior Lecturer at University of Augsburg and ICN Business School Nancy/Berlin</p> <ul style="list-style-type: none"> <li>• Enforcing GDPR and beyond</li> <li>• The race for xtech and IT due diligence</li> <li>• The future of regulation</li> </ul>
<b>17:10</b>	<b>Staying one step ahead: insights into cybercrime and the importance of collaboration</b>
	<p><b>Heiko Löhr</b>, Head of Section Cybercrime Unit, German Federal Criminal Police Office</p> <ul style="list-style-type: none"> <li>• If co-operation between the private industry and the police in case of a cyber-attack is to yield success it should preferably begin ahead of the incident: mutual trust and short information channels reduce and prevent damage in a crisis</li> <li>• The identification of reasons for and originators of cyber-attacks and data leaks is also in the interest of the affected enterprises and their customers</li> <li>• The confiscation of attacking IP infrastructures and the arrest of those involved in cybercrime are unique features of the law enforcement agencies</li> </ul>
<b>17:30</b>	Conference close
