Merci pour l’invitation, ce fut une journée très enrichissante en rencontres et partage de connaissances. Encore bravo pour l’organisation et merci pour le super accueil. "
Consultant Cybersecurité, BNP Paribas

Je vous remercie pour votre accueil et pour la qualité des contenus et présentations de cette édition du e-Crime. "
Information Security Director, La Cinémathèque Française

Merci pour l’invitation au salon e-crime et bravo pour la qualité des présentations et pour les différentes thématiques abordées. "
Head of Fraud Prevention, HSBC

Agenda
Education Seminars
### Key themes

- Cybersecurity: a core risk management discipline
- Making cybersecurity affordable
- Ensuring enterprise scalability
- Cybersecurity for the SME
- Taking third-party security seriously
- Cyber-physical security: a holistic approach
- Intelligence-based cybersecurity
- Prepare for transparency now

### Who attended?

- **Cyber-security**
  - We have a 15-year track record of producing the events cyber-security professionals take seriously.

- **Risk Management**
  - We attract senior risk officers with responsibility for information risk assessment and mitigation.

- **Fraud, Audit, Compliance**
  - We provide the go-to-events for fraud prevention and compliance owners at the world’s key corporates.

- **Data Protection & Privacy**
  - We are a key venue for decision-makers with budget and purchasing authority.

| **09:00** | **Who’s ‘transforming’ your organisation? The relationship between innovation and cybersecurity**  
Bertrand Cahen, Chief Digital Officer, Eiffage Construction  
- Context & impacts of digitalisation on culture, behaviours and power plays in the company  
- Challenges and digital strategy/data – feedback from Eiffage Construction  
- Deploy new methods of collaboration for more sustainable performance  
- The human being at the heart of the device: driving change in digital transformation |
| 09:20 | Digital identities, social engineering and mule networks  
Stephen Topliss, VP of Products, ThreatMetrix  
- How digital identities are used today to enhance new customer acquisition on the digital channel and protect digital banking sessions for existing customers  
- Specific approaches to identify the risk of social engineering based account takeover  
- How a targeted approach to real-time mule account detection can enhance existing fraud prevention strategies |
| **09:40** | **EXECUTIVE PANEL DISCUSSION**  
New technologies, new CISO: how digitalisation is changing the CISO’s role  
Grégoire Alex-Rollmann, Head of Information Systems Security at Manutan International  
Henrik Joulin, GSO & DPO, Icare Assurance  
Bertrand Cahen, Chief Digital Officer, Eiffage Construction |
| 10:00 | **10 reasons why admin rights must go**  
William Culbert, Director Southern Europe, BeyondTrust  
- Uncover the hidden dangers of admin rights, with 10 powers of an admin user that put your organisation at risk  
- Learn how to drastically reduce the attack surface on the endpoint in hours, not months  
- See how end users can still perform all their usual tasks by elevating tasks and applications, never users |
| **10:20** | **Education Seminars | Session 1**  
Accellion  
Secure file collaboration with the Accellion governance platform  
Samuel Benelheni, Senior Enterprise Solutions Consultant for France & Southern Europe, Accellion  
OneTrust  
Risky business: a privacy & security team’s guide to risk scoring  
Victoria Gardin, Privacy Consultant, OneTrust |
| 11:00 | Networking and refreshments                  |
| 11:30 | **Security across borders**                 |
|       | Alexandre Diemer, CISO, Council of Europe  
- Identity management at the heart of border protection  
- How to implement a strategy to protect data in all 47 countries of the Council of Europe?  
- The Cloud. What are the risks and how to secure the cloud?  
- Balancing act: technical vs organisational |
| **11:50** | **Challenges related to identity management and enterprise access**  
Kévin Navette, Regional Sales Manager, OneLogin  
- Creation of access  
- User authentication  
- Security of access  
- Update or removal of access |
| **12:10** | **Combating today’s advanced attacker: key trends, predictions and the need for speed**  
Joël Mollo, Regional Director, South EMEA, CrowdStrike  
- Real world examples of how cybercriminals combine advanced, targeted attack techniques with ransomware to cause massive financial loss. How can your organisation AVOID this?  
- GAIN INSIGHT into global ‘breakout time’ metrics and achieving the ‘1–10’60’ rule to defeat the adversary and prevent a mega breach  
- PREPARE FOR THE NOW – Hear about the most favoured TTPs observed over the last 12 months to predict what you should expect to see in 2019 |
## Agenda

### 12:30 How to use BitSight Security Ratings?

**Alain Melamed**, Regional Manager, Cybersel on behalf of BitSight

Find out how BitSight’s Security Ratings can help organisations and cyber insurers to reduce risk by:
- scaling their vendor risk management programmes
- benchmarking their performance against industry peers
- reporting security progress and results to Boards of Directors
- measuring the cybersecurity performance of potential acquisition targets or portfolio companies.

### 12:50 Education Seminars | Session 2

- **Anomali**
  - Detect your adversaries with cyber-threat intelligence and MITRE ATT&CK
  - Jermain Njemanze, Sales Engineer, Anomali
- **ManageEngine**
  - Decrypting the security mystery with SIEM
  - Christophe Coraboeuf Bensais, SIEM and IT Security Product Manager, ManageEngine

### 13:30 Lunch and networking

### 14:30 GDPR and beyond. Post deadline case studies and actions on what you and your business need to know

**Sébastien Oueslati**, CISO and Head of Information Security Systems, large social welfare organisation

- Protection of your clients’ personal data: a key challenge
- Indirect effects of new regulation
- Reconciling GDPR and Big Data
- The post GDPR era

### 14:50 Vos employés et leurs mots de passe

**Tim Leroy**, Solutions Consultant EMEA, LogMeln

- Comment les entreprises peuvent-elles atténuer les problèmes de mot de passe
- Comment quantifier les coûts de mot de passe pour justifier un investissement dans une solution d’Enterprise Performance Management (EPM)
- Ce qu’il faut rechercher dans une solution EPM, y compris les conseils de Forrester pour la sélection d’un fournisseur

### 15:10 Enterprise ‘cloudification’ and its impact on IT and security

**Ivan Rogissart**, Regional SEM Manager Southern Europe, Zscaler

- With more than 70% of companies migrating all or part of their applications to the cloud, it is logical that security should also adopt a similar strategy
- The environment has evolved and the historic approach of stacking security tools into data centres is no longer relevant, as cloud and mobility provide agility and immediacy
- A new approach is therefore needed to ensure their protection by taking advantage of the benefits of the internet as an extended network

### 15:30 Education Seminars | Session 3

- **Illumio**
  - Protect you digital crown jewels
  - Mario Massard, Systems Engineer, Illumio
- **OneTrust**
  - A privacy playbook for ‘reasonable and appropriate’ security measures and safeguards
  - Victoria Gardin, Privacy Consultant, OneTrust

### 16:10 Networking and refreshments

### 16:30 Sustaining information: What kind of data, for what purpose?

**Adoté Chilloh**, Joint Director of Information Systems and Operational Head of Security, National Library of France

- What is meant by digital document – Definitions – the data concerned
- What are the potential risks of preserving digital documents
- Why sustain information: what steps to minimise this risk
- Example cases in libraries

### 16:50 Cybersecurity risk: measuring what counts

**Vincent Gapaillard**, CISO and Head of Information Security Systems, Lagardère Travel Retail

- Cyber-risk treatment
- How to manage cyber-risk measurement and treatment
- Implementing a cyber-culture to address risks
- How to capitalise on existing resources to offer value-added services

### 17:10 Taking the risk with cyber. Integrating cybersecurity strategy into business infrastructure

**Stéphane Tournadre**, CISO, Laboratoires Servier

- How is cyber-risk integrated into the company’s protection strategy?
- What collaboration should there be between the CISO, the Risk Committee, the ISD and the COMEX?
- How to map and measure cyber-risk?

### 17:30 Conference close
<table>

<tr>
<th>Seminar</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Accellion**<br>Secure file collaboration with the Accellion governance platform<br>Samuel Benelhene, Senior Enterprise Solutions Consultant for France & Southern Europe, Accellion | Cybersecurity helps establish and maintain the enterprise vision, strategy, and goals. Discover how to with Accellion technology.  
- See every file entering and leaving your organisation for complete compliance and control  
- Protect against internal leaks, external threats and process failures  
- CISO Dashboard for deep insight into the exchange of sensitive information |
| **Anomali**<br>Detect your adversaries with cyber-threat intelligence and MITRE ATT&CK<br>Jermain Njemane, Sales Engineer, Anomali | Knowing your adversaries makes it that much easier to anticipate, detect and prevent their attacks. This is the whole purpose of combining cyber-threat intelligence with the MITRE ATT&CK framework. Anomali helps you shift from a reactive mindset to a proactive one and stay ahead of the cyber-threats targeting you.  
- What is cyber-threat intelligence and how is it used to carry out a cyber-survey?  
- What is the interest and importance of the MITRE ATT&CK threat model in a cyber-survey?  
- How can this information be used to better ensure the security of its computer network? |
| **Illumio**<br>Protect you digital crown jewels<br>Mario Massard, Systems Engineer, Illumio | Companies of all sizes are struggling to ensure that their network is truly secure using aging firewall security systems  
- Micro-segmentation, when implemented correctly, can give them the security that they need and provide tremendous network visibility in the process  
- Join us to learn what micro-segmentation is, how it works, and how to implement it |
| **ManageEngine**<br>Decrypting the security mystery with SIEM<br>Christophe Coraboeuf Bensaïs, SIEM and IT Security Product Manager, ManageEngine | SIEM solutions have also been evolving.  
- Security domains  
- Actionable info through normalisation  
- Compliance and security regulations |
| **OneTrust**<br>Risky business: a privacy & security team’s guide to risk scoring<br>Victoria Gardin, Privacy Consultant, OneTrust | Risk scoring across vendor management, breach notifications, DPIAs and other activities is imperative for compliance with many global privacy laws and security frameworks. Organisations routinely tailor their data protection and security activities based on the results of detailed risk assessments, but this leads to a myriad of questions. How do you calculate risk? What constitutes low, medium or high risk? How do you define a risk criteria? What’s the difference between inherent, current and residual risk? In this session, we’ll detail the importance of conducting risk assessments under global privacy laws like the GDPR and security frameworks such as ISO 27001, provide scenario-based approaches to risk assessment and give examples on how to tailor your approaches based on risk level.  
- Understand various approaches to conducting risk assessments  
- Learn how to define a risk criteria and how to calculate risk level  
- Learn how to tailor your privacy and security programmes using a risk-based approach |
| **OneTrust**<br>A privacy playbook for ‘reasonable and appropriate’ security measures and safeguards<br>Victoria Gardin, Privacy Consultant, OneTrust | With a new era of privacy regulations upon us, requirements for implementing ‘reasonable and appropriate’ security measures and safeguards are becoming more common than ever. While privacy and security professionals often view security from different perspectives and may have competing priorities, there are a number of ways in which these differences can be used to the advantage of both teams. In this session, we’ll share a playbook on how to build a harmonised and risk-based security framework that addresses a variety of divisions within an organisation, as well as how security and privacy teams can work together to become more effective.  
- Understand the requirements and importance of implementing ‘reasonable and appropriate’ security measures and safeguards for privacy professionals  
- Outline several areas of common ground that should help every organisation align their security and privacy operations  
- Take away a playbook for building a harmonised and risk-based security framework |
