e-Crime & Cybersecurity Congress Virtual Series: SPAIN

7th e-Crime & Cybersecurity Congress SPAIN VR

 24th November, 2021, Online

Has ransomware changed the rules of cybersecurity?

With all sectors hit hard by disruption and data loss, can governments and CISOs work together to beat the criminals?

AKJ Associates

Ransomware changes the risk calculus – for government *and* CISOs

The past year has seen Spanish organisations hit hard by cyberattacks – and as is the case globally, ransomware is the number threat.

Every sector, including crucial elements of CNI such as government, finance and healthcare, has been affected. In March 2020, just as the pandemic began to hit, a hospital in Torrejón de Ardoz was taken offline by ransomware. Since then, regional giants such as Mapfre, SegurCaixa Adeslas, Adif and many others have fallen victim.

The State Public Employment Service, which manages unemployment benefits and has been critical during the pandemic, was "paralyzed" by ransomware earlier this year, shortly followed by the Ministry of Labor and Social Economy.

Not so long ago, the consequences of a cyberattack for most organisations were a hassle and not much more. Bad press, a fine (relatively small even under GDPR), some additional damages, but nothing they couldn't handle. With a good lawyer, breaches could continue to be swept under the carpet.

Evidently, that is no longer the case.

In the US, the scale of the threat posed by attacks on CNI means President Joe Biden has got involved, introducing new regulation for some sectors and emphasising to business leaders that especially in the hyperconnected "new normal", cybersecurity is key to operational resilience.

The fact that some level of state tolerance (if not actual support) for ransomware criminals is clearly involved, is also, finally, beginning to be recognised. US intelligence agencies were directed to investigate this month's Kaseya attack and talk of cyberespionage is becoming common. Governments realise that leaving cybersecurity to the private sector may not be enough.

Research by security providers shows that Spanish cyber experts are highly aware of the threat, with 85% either having already suffered at least one ransomware attack in the past year, or expecting to. AKJ's own research indicates that the CISO's profile within the business – and the resources allocated to cybersecurity – have increased to match the risk. But with teams still understaffed and under pressure, the question on everyone's minds is: will it be enough?

The 7th e-Crime & Cybersecurity Congress Spain will take place online and will look at how cybersecurity teams are tackling the new normal.
Join our real-life case studies and in-depth technical sessions from the security and privacy teams behind some of the world's most admired brands.

Key Themes

Cybersecurity priorities for hybrid working

We may not be returning to a fully office-based world, but there is little doubt that companies in all sectors want employees to be working more in the office than they are right now. Securing that transition, and the fluid and uncertain environment it creates, is the next challenge for CISOs. **Can you help?**

Securing critical national infrastructure

Critical national infrastructure is being brought to its knees by successful attacks, harming organizations, supply chains and the public. Resourcing and senior management commitment are important but **what can CISOs do to ensure the resilience of critical national infrastructure?**

Resilience and regulation redefining security

The FCA's PS21/3 and the EU's DORA are key steps to ensuring there is regulatory control over operational resilience. US President Joe Biden has also committed to regulating cybersecurity in critical sectors. **But with attacks on the rise, can we expect more regulation to follow?**

Securing email – again

Scammers posing as helpdesks, malware embedded in pandemic-related documents that seem to come from government, health or aid organisations, overloaded employees more likely to accidentally open dangerous attachments: **does email security need to be ramped up even if it impacts business continuity? Are there other solutions?**

Getting Cloud migration right

Migrating to the cloud is a priority. But, if not properly managed, cloud migrations result in extra complexity and risk. So how can firms assess cloud readiness, plan and execute migrations and establish comprehensive cloud governance? **Can you help them transition smoothly and securely to the Cloud?**

Securing digital currencies

The move towards non-cash payment methods during the crisis has been extreme and looks irreversible. In addition, many more governments are now looking at developing their own digital currencies. **So how do we go about securing a world in which most, perhaps all, payments are digital?**

e-Crime & Cybersecurity Congress Virtual Series: SPAIN

Key Themes

Are criminals winning the ransomware war?

Ransomware tests every part of your cybersecurity infrastructure from awareness to endpoint protection to patching to phishing defences. Some attacks are sophisticated, but most rely on traditional methods and vectors. So why is it so hard to beat them? **Is AI or zero trust or something else the answer?**

Securing the enterprise of sensors

Any firm with a manufacturing operation or a supply chain is already hugely exposed to the IoT. From manufacturing, to logistics to services, this is just the beginning. **With so much data flowing from sensors and legacy control systems outside normal networks, how does security work?**

Security on a budget: protecting health and education

Healthcare and Education are just two sectors that have been constantly barraged with attacks across the last 12 months. These sectors contain vast amounts of data and can be brought to a standstill through a successful attack. **What can security teams in key sectors do to improve resilience?**

Doing the basics better

As businesses continue to grow and scale to fit the post pandemic environments, security teams must remain vigilant regarding cyber hygiene. Email is still the key vector. Patching matters. MFA is essential. And now just as ever, back-ups are non-negotiable. **How can security teams remain vigilant when ensuring cyber hygiene?**

Securing the citizen

The COVID era demands unprecedented levels of citizen engagement. Compromises are inevitable to ensure the safety of all. But the systems required to provide safety also create a huge data security and privacy challenge for both governments and employers alike. **Can solution providers help?**

Getting smart with security budgets

Affordability and value for money are as important in cybersecurity as they are in any other service sector. And those allocating budget to cyber need to understand ROI. **So, while new technologies like XDR and new philosophies like ZTNA and SASE sound good in theory, can they demonstrate value and practicality?**

AKJ Associates

Why AKJ Associates?

A History of Delivery

For more than 20 years, AKJ Associates have been running been the world's most sophisticated closed-door meeting places for senior cyber-security professionals from government, law enforcement, intelligence and business.

For example, our annual London-based e-Crime Congress is still **the largest invitation-only, Chatham House rules,** gathering of the most senior information risk and security professionals from business and government in the world.

The UK Home Office sponsored the public sector delegation from 40 countries in 2002 and we are delighted to say they still do today.

Global Engagement

We have run hundreds of events in the **UK, across Europe, the Middle East and Asia**, attracting **tens of thousands of delegates** in cybersecurity, data security and privacy.

These delegates range from C-suite CIOs, CTOs, CROs and C(I)SOs, to heads of enterprise architecture, desktop and network. They encompass all the senior professionals whose input drives security and privacy solution purchase decisions.

And as well as cross-sector events for both private and public sector, we also design and deliver sector-specific conferences for high-value, high-sophistication sectors including the legal sector, financial services and gambling and gaming.

Unrivalled Relationships

Events like this have enabled us to build relationships of trust with **the most influential decision-makers** at the full spectrum of public and private sector organisations in the UK, Europe, Asia and the Middle East.

By providing this audience with valuable insights and business intelligence over the past 20 years, we have built up **the world's most significant community of professionals in cybersecurity.**

We use this to develop new events; to conduct research to understand what cybersecurity professionals are doing, thinking and buying; and to market our conferences and other services.

Smart Lead Generation

We have also developed and trained one of the **most effective marketing and telemarketing operations** in the cybersecurity space.

Our in-depth knowledge of the marketplace allows us to design marketing outreach that **consistently delivers the best audiences** for the providers of critical cybersecurity infrastructure and solutions.

We connect vendors directly with B2B decision-makers. By combining unrivalled reach, deep knowledge of specialist markets and sophisticated marketing we **engage buyers to deliver real results.**

AKJ Associates

Why the e-Crime & Cybersecurity Congress Virtual Series?

The problem: end-user needs are rising, solution providers' too

Our end-user community is telling us that they face a host of new threats in this new environment, to add to their existing challenges.

Remote working, an increased reliance on Cloud and SaaS products, and the leveraging of COVID-19 in phishing, malware and other malicious attack, are all putting organisations across the world under even more strain. **They need cybersecurity products and services that can solve these issues**.

We also know that our vendor partners and community have to continue building pipeline and creating commercial opportunities. They can't just stop. And **self-run webinars cannot replace everything**.

Therefore, **in response to many requests from our loyal end-user community** for us to continue to deliver best practice advice and to give them the up-to-date technical case studies and content they need to cope in the current environment, **we will be adding to our traditional physical service offering.**

The e-Crime & Cybersecurity Congress Virtual Series will offer virtual versions of our key upcoming events and will deliver the **same opportunities for lead generation and market engagement**.

Maintaining the ethos, and mimicking the best features of, our physical events we will continue to offer **unrivalled partnership opportunities to cybersecurity vendors** looking to sell

AKJ Associates

Why the e-Crime & Cybersecurity Congress Virtual Series?

The solution: virtual events:
intuitive, effective, engagement

AKJ's e-Crime Congress Virtual Series events replicate all of the key features of our physical events, preserving all the key engagement and lead-generation opportunities sponsors have come to know and expect:

- Lobbies with extensive sponsor signage

- Opportunities for sponsors and end-users to deliver plenary presentations to all registered attendees

- The chance to provide in-depth Education Seminar sessions in breaks between plenary sessions

- Exhibition booths that can contain video, text, PDF and live chat resources

- Extensive networking opportunities

In addition, there are opportunities for interactivity during both plenary presentations and Education Seminars, and using smart gamification tools we can help ensure sticky engagement with content during the day.

Events run in real time using pre-recorded presentations. They cannot be re-run or downloaded unless sponsors and / or end-users agree for their content to be used in that way.

They are open only to pre-registered, vetted registrants to ensure only the highest quality decision-makers can attend.

And we deliver the same level of delegate information to our sponsors as they expect from physical events.

AKJ Associates
Delivering your message direct to decision-makers

Plenary Speakers

Just as with a physical event, the e-Crime Congress Virtual Series events follow a real-time linear track in which presenters deliver their content to registered attendees.

These presentations are pre-recorded by the speakers and can contain exactly the same mix of slides, graphics, video and speech as would be included in a physical presentation.

While each presentation is running, a live, moderated chat allows those watching the presentation to interact with each other and with the speaker(s).

Speakers can take questions, elaborate on points made in the presentation and organise to discuss details further with attendees offline, at their booths or in the networking lounge.

Education Seminars

At pre-defined points in the day, attendees will be notified that the main plenary sessions are making way for a series of in-depth technical break-outs.

This Education Seminars are effectively pre-recorded webinars in which vendors deep-dive into a topical problem, technology or solution. Created by the sponsor team, these Seminars run simultaneously, just as

they do in our physical event. Attendees choose which session to attend and, again, each Seminar is accompanied by a moderated, live chat in which the Seminar presenter(s) can take questions from those watching the presentation.

At the end of the Seminar, attendees are notified that Networking time is now available before the next Plenary session.

AKJ Associates
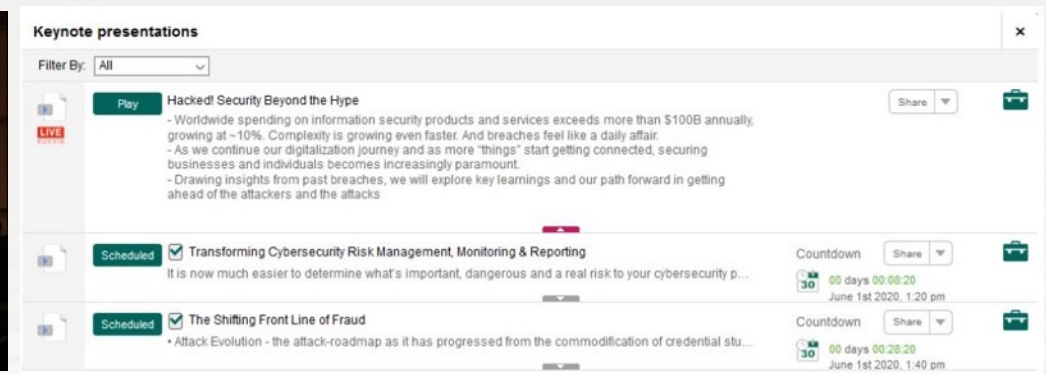

Your team and your resources available in real-time

Exhibition Booths

Sponsor packages that contain a Virtual Booth allow vendors to interact with attendees in the virtual Exhibition Hall. This can be accessed in a number of different ways including via a floorplan, logo displays and directly by entering the Hall itself.

Booths can be customised with vendor logos and avatars; they can incorporate chat, video, and links to research and white papers.

The virtual platform is extremely intuitive to use and delegates find it very easy to find their way around and start interacting.

Sponsors who have presented in Plenary or in an Education Seminar can close their presentations by directing the audience to their booths. And there are additional gamification elements, including sponsor-supplied prizes, that can effectively drive traffic to booths.

Networking Opportunities

The entire virtual event is structured around networking opportunities. Attendees can interact with each other:

- Via the live chats attached to every Plenary Session and Seminar
- Via private-chat with each other or with the sponsors and other speakers
- Via the Exhibition Booth chat functions
- Via the dedicated Networking Lounge

Sponsors are able to join any chat sessions attached to their own presentations (in Plenary or Education Seminar); they can interact privately or in group chat in the networking lounge.

And using their own Virtual Booths they can chat to potential clients, exchange contact information, and deliver video and text-based content to those attendees too.

AKJ Associates
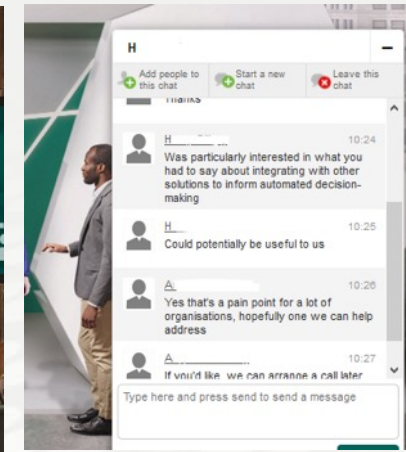

Delivering the most senior cybersecurity solution buyers

Our USP? We put buyers and sellers together

We understand that every vendor needs to sell more. That is the bottom line. This is even more necessary in the present situation.

You will have access to the most senior buying audience in the cyber-security market.

AKJ Associates has been building relationships with senior information risk and security professionals for 20 years and our cybersecurity community is the largest of its kind globally.

We know the senior executives who drive strategy from the top, we know the enterprise architects who often control the largest budgets and we know the IT Security Leads and Engineers who so often dictate the purchase process.

All of these job titles attend e-Crime & Cybersecurity Congress events.

Getting access to the right people at the right time always increases the lead generation and always increases profitable sales activity.
Cyber-security
We have a 20-year track record of producing the events cyber-security professionals take seriously

Risk Management
We attract senior risk officers with responsibility for information risk assessment and mitigation

Fraud, Audit, Compliance
We provide the go-to events for fraud prevention and compliance owners at the world's key corporates

Data Protection & Privacy
We are a key venue for decision-makers with budget and purchasing authority

AKJ Associates

We deliver the most focused selling opportunity

Specific, actionable and relevant information for time-constrained industry professionals

The perfect platform for solution providers to deliver tailored advice to the right audience

Focus

Target growth

Each event represents a targeted opportunity to address the needs of a specific community whose need for your solutions and services is growing.

Leads

Boost sales

Sponsors can tailor messages to the needs of an audience that shares similar concerns and challenges, looking for solutions now.

Choice

Meet commercial aims

We work with sponsors to ensure they meet their commercial aims. We offer a number of sponsorship options, each providing specific benefits.

Value

Showcase solutions

Our events provide sponsors with a unique platform to showcase solutions, as well as provide advice on how best to solve delegates' key challenges.

AKJ Associates

Delegate Acquisition

- The e-Crime & Cybersecurity Congress has the **largest community of genuine cybersecurity stakeholders** to invite to our events.

- Our reputation for hosting **exceptional events with informative content, excellent networking opportunities and the best vendor partners** means delegates know they are attending a quality event, and are willing to give up the time to attend.

- Our delegates are **invited by an in-house delegate liaison team** who call senior security and privacy professionals at public and private sector companies with a personal invitation to attend

- We **follow up all registrations** with further calls, emails on logistics requirements and reminders to **ensure the best possible attendance**.

Lead Sourcing

- The e-Crime & Cybersecurity Congress prides itself on **putting the key cybersecurity buyers and sellers together**

- To offer you the best prospects to network with, **we don't invite academics, job seekers, consultants,** non-sponsoring vendors or marketing service providers to this closed-door event. This **attention to quality over quantity** will be the case for our virtual offering.

- Each of our vendor partners will receive a delegate list at the end of the event.

- Through our chat lounge, presentation Q&A chat box, and Virtual Booth chat you will have **unrivalled opportunities to network** virtually with high-quality prospects at the event.

Get Your Message Across

- **Content is king,** which is why the e-Crime & Cybersecurity Congress prides itself on delivering informative and useful content, to attract senior audiences of decision-makers.

- Deliver an exclusive 20-min keynote presentation in the virtual plenary theatre, or host a 30-min targeted workshop session: good content drives leads to your virtual booth, and showcases your company's expertise

- AKJ's in-house content / research team will moderate and complement the agenda with best practice from leading experts and senior security professionals from the end-user community

- If you are not presenting, the virtual booth offers the opportunity to share white papers and other resources for delegates to download

Exclusivity Delivered

- AKJ Associates has never done trade shows. We see most value in working with **a select number of the top vendor partners**, and offering those companies the best access to leads.

- Our virtual events keep the same ethos, limiting vendor numbers. We will not be a virtual hangar with hundreds of vendors competing for attention. We will keep our **virtual congresses exclusive and give you the best networking opportunities**.

- All virtual booths offer the same opportunities with the same capacity and functionality regardless of the vendor company.

- This is an opportunity to **continue building pipeline and driving leads** in partnership with our outstanding 20-year reputation and the e-Crime & Cybersecurity Congress brand.

AKJ Associates

Eckoh

We were thrilled to welcome so many attendees to our speaker session as well as to our virtual booth. The agenda was well put together offering insightful and relevant topics. The event and build up was well organised and the actual event site was easy to navigate - from the lobby to networking and joining the conference sessions - making it a great experience for participants as well as delegates.

KASPERSKY lab

This is always a great event for 'taking the temperature' on security issues, to get a feel for people's impressions on current security challenges and to find out what organizations of all kinds are doing.

vmware Carbon Black

AKJ has been a valuable partner for us for a few years now, enabling us to build relationships and engage with the CISO community in a number of key territories across Europe. The events they hold are a great vehicle for discussing the latest challenges and opportunities in the security sector, and our work with them has delivered way beyond expectations.

VERACODE

The level of engagement yesterday *[at the Virtual Securing Financial Services Congress]* was outstanding and we have already managed to book 2 meetings as a result, live on the day.

✓**Ninety five percent of our exhibitors and sponsors work with us on multiple occasions each year**

✓**Our sponsor renewal rate is unrivalled in the marketplace**

✓**This is because our sponsors generate real business at our events every year**

AKJ Associates
