

11th e-Crime & Cybersecurity Congress **France**

March 22nd, 2022, Paris

Under attack: how France is fighting back against cybercrime

Will plans to increase budgets and launch a new cyber centre help the private sector defend itself?

Can government, solution providers and private companies collaborate?

Cyber-attacks in France increased fourfold in 2020 and have continued in 2021. As Armed Forces minister Florence Parly, says: **"If there is indeed a space where malevolence never sleeps, not even with one eye, a space where each of us can become the target, the vector, or even the amplifier of its threat, it is indeed cyber-space."**

As if to emphasise those words, in the middle of last year, French President Emmanuel Macron changed his phone and phone number in light of allegations that Pegasus spyware might have targeted him, triggering an emergency meeting on cybersecurity at the Élysée Palace.

This followed a series of attacks on French hospitals which prompted Macron to call them "a crisis within a crisis" and to commit €1 billion to strengthen the cyber-security of sensitive systems. He also announced the creation of a new cyber defence centre and later added a commitment to spend an additional €500 million on security, including cybersecurity.

Attacks have continued to hit key French sites and businesses, with breaches at

the French government's 'France-Visas' website, which contains the personal data of visa applicants hoping to visit or emigrate to France, and also the Asian businesses of French insurer AXA.

Attackers have ranged from "mafia groups" operating in eastern Europe, to Russian and Chinese-linked threat actors.

The government has adopted both an offensive and defensive stance and has also invested heavily in collaboration. Later this year, a new cybersecurity centre in Paris's financial district comes online. Owned by 60 different entities operating in cybersecurity, it will host 1,500 researchers and people working for private companies and the government.

Part of the centre's goal is to triple the annual sales of French cybersecurity companies to €€25 billion in 2025 from €7.3 billion in 2019, and double the number of jobs in the sector by 2025. But it is also designed to deliver advanced protection for both public and private sectors. **In the meantime though, what can CISOs do about the burgeoning threatscape?**

The e-Crime & Cybersecurity Congress France will look at how we all need a new kind of security. Join our real-life case studies and in-depth technical sessions from the security and privacy teams at some of the world's most admired brands.

e-Crime & Cybersecurity Congress: **France**

Key Themes

Are criminals winning the ransomware war?

Ransomware tests every part of your cybersecurity infrastructure from awareness to endpoint protection to patching to phishing defences. Some attacks are sophisticated, but most rely on traditional methods and vectors. So why is it so hard to beat them? **Is AI or zero trust or something else the answer?**

Too little time for implementation?

As cyber threats have multiplied, the time CISOs have to choose, buy and implement security solutions has fallen sharply. But it has never been more critical to make the right choice. **So how can cybersecurity professionals change their RFP and POC processes while maintaining quality?**

Re-engineering the SOC: from logs to automated XDR

Does anybody really look at all their logs? Data and alert overload have long been the Achilles Heel of the SOC team and they constitute a broader failing in many cybersecurity architectures. What companies need are systems that can process this data into actionable insights. **Can XDR help?**

Building better Cloud governance

Migrating to the cloud is a priority. But, if not properly managed, cloud migrations result in extra complexity and risk. So how can firms efficiently assess cloud readiness, plan and execute migrations and establish comprehensive cloud governance? **Can you help companies transition smoothly and securely to the Cloud?**

Building-in security: from DevOps to SecDevOps?

It is critical, as companies ramp up their digital business models, that they build security in from the beginning. But that is a big ask. And even before the crisis, security teams found it hard to gain leverage over the business. **How can cybersecurity teams help? Is this a CIO versus CISO battle?**

Can zero trust be done?

Zero Trust / ZTNA / SASE – they promise solutions to key problems faced by CISOs today. But how realistic are they? Do they take into account existing legacy technology and the ways in which real companies actually do business day-to-day? **Can you explain how a real-world implementation works?**

e-Crime & Cybersecurity Congress: **France**

Key Themes

Closing the cybersecurity skills gap

Increased regulation and a sharp rise in attacks and incidents mean security budgets in the Middle East are on the increase. However, CISOs may find themselves struggling to buy the resource they need most: skilled cybersecurity staff. **So how are companies retaining and hiring talent? And which technologies can bridge the gaps?**

Securing the citizen

The COVID era demands unprecedented levels of citizen engagement. Compromises are inevitable to ensure the safety of all. But the systems required to provide safety also create a huge data security and privacy challenge for both governments and employers alike. **Can solution providers help?**

From smart machines to smart cities – securing the IoT

How long will it be before every significant device and location is part of an ecosystem of sensors connected to public and private networks? Driving apps tell insurers what premiums to charge. Packaging machines report their own breakdowns. **But are these devices visible on your network and how are you securing them?**

Moving to Cloud Native?

Applications have become increasingly complex with users demanding more and more. They expect rapid responsiveness, innovative features, and zero downtime. Performance problems are no longer acceptable. They'll easily move to your competitor. **Should you go Cloud Native?**

Cybersecurity for business resilience

Forced, rapid digitalisation has revealed the fragmented nature of many security programmes. But fragmentation fails the business ecosystem. To protect the business while enabling innovation and flexibility means new models and approaches for cyber. **Are automation and orchestration the answer?**

Securing digital currencies

The move towards non-cash payment methods during the crisis has been extreme and looks irreversible. In addition, many more governments are now looking at developing their own digital currencies. **So how do we go about securing a world in which most, perhaps all, payments are digital?**

Why AKJ Associates?

For more than 20 years, AKJ Associates has been running been the world's most sophisticated closed-door meeting places for senior cyber-security professionals from government, law enforcement, intelligence and business.

For example, our annual London-based e-Crime Congress is still **the largest invitation-only, Chatham House rules**, gathering of the most senior information risk and security professionals from business and government in the world.

The UK Home Office sponsored the public sector delegation from 40 countries in 2002 and we are delighted to say they still do today.

We have run hundreds of events in the **UK, across Europe, the Middle East and Asia**, attracting **tens of thousands of delegates** in cybersecurity, data security and privacy.

These delegates range from C-suite CIOs, CTOs, CROs and C(I)SOs, to heads of enterprise architecture, desktop and network. They encompass all the senior professionals whose input drives security and privacy solution purchase decisions.

And as well as cross-sector events for both private and public sector, we also design and deliver sector-specific conferences for high-value, high-sophistication sectors including the legal sector, financial services and gambling and gaming.

Events like this have enabled us to build relationships of trust with **the most influential decision-makers** at the full spectrum of public and private sector organisations in the UK, Europe, Asia and the Middle East.

By providing this audience with valuable insights and business intelligence over the past 20 years, we have built up **the world's most significant community of professionals in cybersecurity**.

We use this to develop new events; to conduct research to understand what cybersecurity professionals are doing, thinking and buying; and to market our conferences and other services.

We have also developed and trained one of the **most effective marketing and telemarketing operations** in the cybersecurity space.

Our in-depth knowledge of the marketplace allows us to design marketing outreach that **consistently delivers the best audiences** for the providers of critical cybersecurity infrastructure and solutions.

We connect vendors directly with B2B decision-makers. By combining unrivalled reach, deep knowledge of specialist markets and sophisticated marketing we **engage buyers to deliver real results**.

Delivering your message direct to decision-makers

Plenary Speakers

The e-Crime Congress Series events offer sponsors the opportunity to deliver content in a number of different ways.

Plenary speakers **deliver their presentations on the day of the event from a fully featured AV stage to a face-to-face audience.**

Their presentations can contain slides, video and audio and speakers can deliver their speeches from the podium or from any point on the stage.

Plenary presentations are 20 minutes long and take place in the main event auditorium guaranteeing access to the largest possible audience of cybersecurity professionals on the day.

Presentations are generally designed to be informative, topical and actionable, with the use of case studies and up-to-the-minute references to current developments.

Double-handed talks with clients are also welcomed.

Education Seminars

At pre-defined points in the day, attendees will be notified that the main plenary sessions are making way for a series of in-depth technical break-outs.

These sessions of up to 30 attendees are held in break-out rooms and delivered live to attendees.

They are an opportunity for vendors to deep-dive into a topical problem, technology or solution in front of a group of cybersecurity professionals who have self-

selected as being interested in the topic being discussed.

They are also the ideal venue for solution providers to go into technical detail about their own products and services.

These Seminars run simultaneously, and attendees choose which session to attend.

At the end of the Seminar, attendees are notified that Networking time is now available before the next Plenary session.

Your team and your resources available in real-time

Exhibition Booths

Sponsor packages that contain an Exhibition Booth give sponsors the opportunity to be present in the main networking area of the event.

At these booths, sponsor representatives can interact with delegates face-to-face, deliver messaging and technical information via video presentations, demo products using their own BYOD technology and to distribute printed marketing and product information.

Sponsors may wish to consider different ways to drive footfall to their booths.

For example, sponsors who have presented in Plenary or in an Education Seminar can close their presentations by directing the audience to their booths.

And there are additional gamification elements available, including sponsor-supplied prizes, that can effectively drive traffic to booths.

Delivering the most senior cybersecurity solution buyers

Our USP? We put buyers and sellers together

We understand that every vendor needs to sell more. That is the bottom line. This is even more necessary in the present situation.

You will have access to the most senior buying audience in the cyber-security market.

AKJ Associates has been building relationships with senior information risk and security professionals for 20 years and our cybersecurity community is the largest of its kind globally.

We know the senior executives who drive strategy from the top, we know the enterprise architects who often control the largest budgets and we know the IT Security Leads and Engineers who so often dictate the purchase process.

All of these job titles attend e-Crime & Cybersecurity Congress events.

Getting access to the right people at the right time always increases the lead generation and always increases profitable sales activity.

Cyber-security

We have a 20-year track record of producing the events cyber-security professionals take seriously

Risk Management

We attract senior risk officers with responsibility for information risk assessment and mitigation

Fraud, Audit, Compliance

We provide the go-to events for fraud prevention and compliance owners at the world's key corporates

Data Protection & privacy

We are a key venue for decision-makers with budget and purchasing authority

We deliver the most focused selling opportunity

Delegate Acquisition

- The e-Crime & Cybersecurity Congress has the **largest community of genuine cybersecurity stakeholders** to invite to our events.
- Our reputation for hosting **exceptional events with informative content, excellent networking opportunities and the best vendor partners** means delegates know they are attending a quality event, and are willing to give up the time to attend.
- Our delegates are **invited by an in-house delegate liaison team** who call senior security and privacy professionals at public and private sector companies with a personal invitation to attend
- We **follow up all registrations** with further calls, emails on logistics requirements and reminders to **ensure the best possible attendance**.

Lead Sourcing

- The e-Crime & Cybersecurity Congress prides itself on **putting the key cybersecurity buyers and sellers together**
- To offer you the best prospects to network with, **we don't invite academics, job seekers, consultants, non-sponsoring vendors or marketing service providers** to this closed-door event. This **attention to quality over quantity** has been the hallmark of AKJ's events for 20 years.
- Each of our vendor partners will receive a delegate list at the end of the event.
- Through our targeted networking breaks built into our agendas you will have **unrivalled opportunities to network** with high-quality prospects with face-to-face networking at the event.

Get Your Message Across

- **Content is king**, which is why the e-Crime & Cybersecurity Congress prides itself on delivering informative and useful content, to attract senior audiences of decision-makers.
- Deliver an exclusive 20-min keynote presentation in the virtual plenary theatre, or host a 30-min targeted workshop session: good content drives leads to your booth, and showcases your company's expertise
- AKJ's in-house content / research team will complement the agenda with best practice from leading experts and senior security professionals from the end-user community
- If you are not presenting, the exhibitor booth offers the opportunity to share white papers and other resources for delegates to takeaway

Exclusivity Delivered

- AKJ Associates has never done trade shows. We see most value in working with **a select number of the top vendor partners**, and offering those companies the best access to leads.
- Our events keep the same ethos as when we first started 20 years ago, limiting vendor numbers. We will not be a hangar with hundreds of vendors competing for attention. We will keep our **events exclusive to give the best networking opportunities**.
- All booths offer the same opportunities with the same capacity and functionality regardless of the vendor company.
- This is an opportunity to **continue building pipeline and driving leads** in partnership with our outstanding 20-year reputation and the e-Crime & Cybersecurity Congress brand.

What our sponsors say about us

It was indeed a great show. Despite the situation overall [COVID 19] the number of people that turned up, shows the trust people have of the e-Crime brand. Wish you all the best for the upcoming events and we shall surely be a part of them.

This is always a great event for 'taking the temperature' on security issues, to get a feel for people's impressions on current security challenges and to find out what organizations of all kinds are doing.

vmware Carbon Black

AKJ has been a valuable partner for us for a few years now, enabling us to build relationships and engage with the CISO community in a number of key territories across Europe. The events they hold are a great vehicle for discussing the latest challenges and opportunities in the security sector, and our work with them has delivered way beyond expectations.

✓ **Ninety five percent of our exhibitors and sponsors work with us on multiple occasions each year**

✓ **Our sponsor renewal rate is unrivalled in the marketplace**

✓ **This is because our sponsors generate real business at our events every year**

AKJ Associates
