

12th Annual e-Crime & Cybersecurity Congress **France**

March 23rd, 2023, Paris, France

France: in the cross-hairs of the state-backed hacker

Nation-state attacks are now more dangerous than ever. To beat them cybersecurity has to change – and it's little to do with technology

From secrecy to transparency: how cybersecurity has to change

According to a recent study, **75% of French participants believed they had been targeted by a cyber-attack by an organization acting on behalf of a nation-state** and 82% believed nation-states are working through cybercriminal groups to execute their cyber campaigns. They believe the main aim of these attacks is sabotage or disruption of their organizations' operations but almost half had also seen attacks on personal data and IP, financial data and business process operations data.

When asked which factors make them particularly vulnerable to nation-state actors, French respondents identified a lack of collaboration between their sector and their national government (37%), a lack of cyber hygiene across their organizations (36%), the use of outdated security technologies (34%) and the cyber talent shortage (34%).

The fact that CISOs see collaboration with government as a key weak link in the security chain is interesting. France, along with other countries, has institutionalised cyber defence at state level and there is interaction between the public and private sectors. **More interesting is what the CISOs did not say: the real issue in cybersecurity today is in disclosure, data sharing and collaboration between companies themselves.**

Organisations are still extremely unwilling to disclose attacks and breaches; many refuse to talk in even general terms about the ways in which they implement cybersecurity, believing that somehow this "puts a target on their backs" (when attackers know their entire security stack within a few minutes of conducting reconnaissance and when everyone is already a target).

French respondents in this study were most resistant to share information about the data affected, the length of time their organization was exposed or the financial cost of the incident. They are not alone – other countries are not far behind.

But this lack of transparency is the core issue in cybersecurity today: without data sharing organizations cannot learn from their collective experiences; without accurate data on attacks, attack vectors and material impact it is impossible to build quantitative models to evaluate cyberrisk and accurately assign resources to that risk; without that data designing and pricing cyber-insurance is just a guessing game.

When asked whether national governments should do more to support organizations in defending them against nation-state cyber-attacks, including things like provision of real-time threat intel, 89% of British, German and French respondents agreed. But only 64% of French said they have or would proactively reach out to government.

So, how do we get organisations to collaborate better? How can companies find a way to share data anonymously but in enough detail to be valuable for the collective good? And if companies will not share voluntarily, then given the rise of nation-state attackers, will some kind of public-private collaboration have to be mandated simply for the defence of the nation?

The e-Crime & Cybersecurity Congress France will look at how new business models are stretching under-resourced security teams to the limit. Join our real-life case studies and in-depth technical sessions from the security and privacy teams at some of the world's most admired brands.

Key Themes

The pros and cons of managed services

Are single point solutions and on-prem security really failing the business? What about the alternatives? What kinds of company need what kinds of third-party help? And where does that leave the in-house security team? **Do you have solutions that can help relieve the pressures on under-resourced CISOs?**

Are AI / ML solutions the answer?

If the practical realities of business nix conventional zero trust ideas, then what else? Some say that AI and behavioural analysis are better suited to a world where perfect data and visibility are unavailable. **But are they right? And don't these solutions only pick up problems after they have occurred?**

Here comes real cybersecurity regulation

Data privacy is only a small part of the picture. Regulators are looking at operational resilience in key sectors like finance – securing the wholesale payments market is a priority and others will follow. They are looking at disclosure and fining the miscreants. **Can you help businesses comply with new regimes?**

Building better Cloud security

Migrating to the cloud is a priority. But, if not properly managed, cloud migrations result in extra complexity and risk. So how can firms efficiently assess cloud readiness, plan and execute migrations and establish comprehensive cloud governance? **Can you help companies transition smoothly and securely to the Cloud?**

Developing the next generation of security leaders

If cybersecurity is to change to meet the evolution of our digital world, then so must those who implement it. CISOs cannot cling to an IT paradigm and companies must move away from firing at the first breach. **What does a next-gen CISO look like and are you one of them?**

Can zero trust be done?

Zero Trust / ZTNA / SASE – they promise solutions to key problems faced by CISOs today. But how realistic are they? Do they take into account existing legacy technology and the ways in which real companies actually do business day-to-day? **Can you explain how a real-world implementation works?**

Why AKJ Associates?

A History of Delivery

For more than 20 years, AKJ Associates has been running the world's most sophisticated closed-door meeting places for senior cyber-security professionals from government, law enforcement, intelligence and business.

For example, our annual London-based e-Crime Congress is still **the largest invitation-only, Chatham House rules**, gathering of the most senior information risk and security professionals from business and government in the world.

The UK Home Office sponsored the public sector delegation from 40 countries in 2002 and we are delighted to say they still do today.

Global Engagement

We have run hundreds of events in the **UK, across Europe, the Middle East and Asia**, attracting **tens of thousands of delegates** in cybersecurity, data security and privacy.

These delegates range from C-suite CIOs, CTOs, CROs and C(I)SOs, to heads of enterprise architecture, desktop and network. They encompass all the senior professionals whose input drives security and privacy solution purchase decisions.

And as well as cross-sector events for both private and public sector, we also design and deliver sector-specific conferences for high-value, high-sophistication sectors including the legal sector, financial services and gambling and gaming.

Unrivalled Relationships

Events like this have enabled us to build relationships of trust with **the most influential decision-makers** at the full spectrum of public and private sector organisations in the UK, Europe, Asia and the Middle East.

By providing this audience with valuable insights and business intelligence over the past 20 years, we have built up **the world's most significant community of professionals in cybersecurity**.

We use this to develop new events; to conduct research to understand what cybersecurity professionals are doing, thinking and buying; and to market our conferences and other services.

Smart Lead Generation

We have also developed and trained one of the **most effective marketing and telemarketing operations** in the cybersecurity space.

Our in-depth knowledge of the marketplace allows us to design marketing outreach that **consistently delivers the best audiences** for the providers of critical cybersecurity infrastructure and solutions.

We connect vendors directly with B2B decision-makers. By combining unrivalled reach, deep knowledge of specialist markets and sophisticated marketing we **engage buyers to deliver real results**.

Delivering your message direct to decision-makers

Plenary Speakers

The e-Crime Congress Series events offer sponsors the opportunity to deliver content in a number of different ways.

Plenary speakers **deliver their presentations on the day of the event from a fully featured AV stage to a face-to-face audience.**

Their presentations can contain slides, video and audio and speakers can deliver their speeches from the podium or from any point on the stage.

Plenary presentations are 20 minutes long and take place in the main event auditorium guaranteeing access to the largest possible audience of cybersecurity professionals on the day.

Presentations are generally designed to be informative, topical and actionable, with the use of case studies and up-to-the-minute references to current developments.

Double-handed talks with clients are also welcomed.

Education Seminars

At pre-defined points in the day, attendees will be notified that the main plenary sessions are making way for a series of in-depth technical break-outs.

These sessions of up to 30 attendees are held in break-out rooms and delivered live to attendees.

They are an opportunity for vendors to deep-dive into a topical problem, technology or solution in front of a group of cybersecurity professionals who have self-

selected as being interested in the topic being discussed.

They are also the ideal venue for solution providers to go into technical detail about their own products and services.

These Seminars run simultaneously, and attendees choose which session to attend.

At the end of the Seminar, attendees are notified that Networking time is now available before the next Plenary session.

Your team and your resources available in real-time

Exhibition Booths

Sponsor packages that contain an Exhibition Booth give sponsors the opportunity to be present in the main networking area of the event.

At these booths, sponsor representatives can interact with delegates face-to-face, deliver messaging and technical information via video presentations, demo products using their own BYOD technology and to distribute printed marketing and product information.

Sponsors may wish to consider different ways to drive footfall to their booths.

For example, sponsors who have presented in Plenary or in an Education Seminar can close their presentations by directing the audience to their booths.

And there are additional gamification elements available, including sponsor-supplied prizes, that can effectively drive traffic to booths.

Delivering the most senior cybersecurity solution buyers

Our USP? We put buyers and sellers together

We understand that every vendor needs to sell more. That is the bottom line. This is even more necessary in the present situation.

You will have access to the most senior buying audience in the cyber-security market.

AKJ Associates has been building relationships with senior information risk and security professionals for 20 years and our cybersecurity community is the largest of its kind globally.

We know the senior executives who drive strategy from the top, we know the enterprise architects who often control the largest budgets and we know the IT Security Leads and Engineers who so often dictate the purchase process.

All of these job titles attend e-Crime & Cybersecurity Congress events.

Getting access to the right people at the right time always increases the lead generation and always increases profitable sales activity.

Cyber-security

We have a 20-year track record of producing the events cyber-security professionals take seriously

Risk Management

We attract senior risk officers with responsibility for information risk assessment and mitigation

Fraud, Audit, Compliance

We provide the go-to events for fraud prevention and compliance owners at the world's key corporates

Data Protection & privacy

We are a key venue for decision-makers with budget and purchasing authority

We deliver the most focused selling opportunity

Specific, actionable and relevant information for time-constrained industry professionals

The perfect platform for solution providers to deliver tailored advice to the right audience

Focus

Target growth

Each event represents a targeted opportunity to address the needs of a specific community whose need for your solutions and services is growing.

Leads

Boost sales

Sponsors can tailor messages to the needs of an audience that shares similar concerns and challenges, looking for solutions now.

Choice

Meet commercial aims

We work with sponsors to ensure they meet their commercial aims. We offer a number of sponsorship options, each providing specific benefits.

Value

Showcase solutions

Our events provide sponsors with a unique platform to showcase solutions, as well as provide advice on how best to solve delegates' key challenges.

Delegate Acquisition

- The e-Crime & Cybersecurity Congress has the **largest community of genuine cybersecurity stakeholders** to invite to our events.
- Our reputation for hosting **exceptional events with informative content, excellent networking opportunities and the best vendor partners** means delegates know they are attending a quality event, and are willing to give up the time to attend.
- Our delegates are **invited by an in-house delegate liaison team** who call senior security and privacy professionals at public and private sector companies with a personal invitation to attend
- We **follow up all registrations** with further calls, emails on logistics requirements and reminders to **ensure the best possible attendance.**

Lead Sourcing

- The e-Crime & Cybersecurity Congress prides itself on **putting the key cybersecurity buyers and sellers together**
- To offer you the best prospects to network with, **we don't invite academics, job seekers, consultants, non-sponsoring vendors or marketing service providers** to this closed-door event. This **attention to quality over quantity** has been the hallmark of AKJ's events for 20 years.
- Each of our vendor partners will receive a delegate list at the end of the event.
- Through our targeted networking breaks built into our agendas you will have **unrivalled opportunities to network** with high-quality prospects with face-to-face networking at the event.

Get Your Message Across

- **Content is king**, which is why the e-Crime & Cybersecurity Congress prides itself on delivering informative and useful content, to attract senior audiences of decision-makers.
- Deliver an exclusive 20-min keynote presentation in the virtual plenary theatre, or host a 30-min targeted workshop session: good content drives leads to your booth, and showcases your company's expertise
- AKJ's in-house content / research team will complement the agenda with best practice from leading experts and senior security professionals from the end-user community
- If you are not presenting, the exhibitor booth offers the opportunity to share white papers and other resources for delegates to takeaway

Exclusivity Delivered

- AKJ Associates has never done trade shows. We see most value in working with **a select number of the top vendor partners**, and offering those companies the best access to leads.
- Our events keep the same ethos as when we first started 20 years ago, limiting vendor numbers. We will not be a hangar with hundreds of vendors competing for attention. We will keep our **events exclusive to give the best networking opportunities.**
- All booths offer the same opportunities with the same capacity and functionality regardless of the vendor company.
- This is an opportunity to **continue building pipeline and driving leads** in partnership with our outstanding 20-year reputation and the e-Crime & Cybersecurity Congress brand.

What our sponsors say about us

It was indeed a great show. Despite the situation overall [COVID 19] the number of people that turned up, shows the trust people have of the e-Crime brand. Wish you all the best for the upcoming events and we shall surely be a part of them.

This is always a great event for 'taking the temperature' on security issues, to get a feel for people's impressions on current security challenges and to find out what organizations of all kinds are doing.

AKJ has been a valuable partner for us for a few years now, enabling us to build relationships and engage with the CISO community in a number of key territories across Europe. The events they hold are a great vehicle for discussing the latest challenges and opportunities in the security sector, and our work with them has delivered way beyond expectations.

✓ **Ninety five percent of our exhibitors and sponsors work with us on multiple occasions each year**

✓ **Our sponsor renewal rate is unrivalled in the marketplace**

✓ **This is because our sponsors generate real business at our events every year**

AKJ Associates
