14th Annual e-Crime & Cybersecurity Congress France

May 27th, 2025, Paris, France

Building a better cybersecurity model

Are security professionals focusing on the right issues? And how can we all work together better to protect society, the economy and our institutions?

AKJ Associates

https://akjassociates.com/event/france

Co-operate, communicate, combine

We live in a new era in which continuous cyberattacks against public and private sector organisations are being used to extract money as well as undermine confidence in trusted institutions and processes.

This changes the meaning of cybersecurity: it is no longer enough to focus on narrow measures of business risk, and to treat security as an internal risk management problem. It's not even enough to extend risk management to a narrowly defined group of third parties who we believe are most significant for our own organisations.

That thinking understates the true damage that continuous degradation and disruption have across our shared societal ecosystems. We are truly all in this together and we have a shared responsibility to protect society and citizens that extends far beyond the perimeters of our own P&Ls.

Of course, we cannot avoid also talking about specific threats, strategies and technologies and France has experienced significant recent attacks on multinational Schneider Electric (in which the ransomware group demanded payment in baguettes and crypto!).

We have seen critical disruption in pharmaceutical distribution with the recent ransomware attack on Cerp Bretagne Nord, orchestrated by the notorious group Hunters International. This attack has not only compromised the cooperative's data but also disrupted its essential services, impacting pharmacies across multiple French regions. Free, France's second-largest telecoms company, recently confirmed that it had been hit by a cyberattack, though the firm has not confirmed the total number of individuals impacted by the breach, not when it took place. In fact, the company's acknowledgement of the incident only took place following a cybercriminal listing what they claimed were two databases stolen from Free, affecting more than 19 million customers, on a cybercrime forum.

This lack of transparency in security cannot continue. To protect society we need transparency and collaboration by all, not a misguided focus on protecting our own reputations.

There have also been attacks in which criminal claim to have breached firms who then deny it.

The APT73 / BASHE / BASHE ransomware group targeted SFR, Société française du radiotelephon), the second-largest telecom operator in France, had to deny claiming to have exfiltrated 1,445,684 records containing sensitive information such as names, phone numbers, and addresses.

And in December 2024, a ransomware group claimed to have compromised an Atos database. Atos then announced that no infrastructure managed by Atos was breached, no source code accessed, and no Atos IP or Atos proprietary data exposed.

The picture is one of increasing attacks and increasing disruption. We must all work together to defeat a threat that may not be immediately existential to our organisation, but which is becoming a cancer on our economies and societies.

The e-Crime & Cybersecurity Congress France will look at both the tactical and technological best practices that we must adopt to stay cyber-safe, but also the bigger picture issues we must address if cybersecurity is to remain fit for purpose.

NIS2 – a changing the game in cybersecurity?

NIS2 expands the scope of who is included. It adds more regulations and divides the world into two tiers, each with different requirements. And it increases the personal liability of senior officers around cybersecurity failings. So how does this new regulatory environment change the cybersecurity calculus? What do firms need to do now?

Insuring the uninsurable?

Cyber-insurers need to understand the risks they are insuring if they are to set premiums at a level that makes sense. They also need to know that they are insuring risks that clients have taken steps to mitigate properly: no-one will insure those who leave their digital doors wide open. What does this mean for CISOs? What can and can't be insured?

Key Themes

Cybersecurity as a service: the pros and cons

MSSP, MDR, CSaaS – all of these offer varying degrees of outsourced cybersecurity services. For many companies, keeping up with technology in general and cyber threats in particular is impossible and outside their core competence. So, when does it make sense to outsource? And what outsourcing arrangements make sense for which firms?

Cybersecurity for SaaS/IaaS/PaaS

Most companies' core reliance is now upon a small number of monolithic application suites and Cloud services. In addition, they are likely to be developing their own software in, and fully incorporating, the Cloud. These and other changes fundamentally alter the IT landscape in which cybersecurity operates. **So do CISOs need a new model for cybersecurity and are legacy solutions still valid?**

AKJ Associates

Making the most of next gen tech: automation, AI and the rest

The next 20 years will see an ecosystem of small single-issue vendors slim down to a far less complex set of larger platforms able to invest in continuous development and offering to cover all or large chunks of organisations' security needs. **But will the winners in this evolution be those at today's cutting edge?**

Upskilling security teams

No organisation has an infinite budget. And most organisations are struggling to find sufficient security staff – the skills shortage is growing. This dynamic affects the type of onprem security operation firms can employ and means that improving internal skillsets is critical to the security model. So how can CISOs continuously upskill their teams?

Ransomware – dealing with the new normal

The US Treasury reported that companies paid an estimated \$5.2 billion in BitCoin transactions due to ransomware payments for companies in 2021, and only a quarter of ransomware attacks are reported. Ransomware is here to stay. **So how can CISOs stop it being a permanent tax on the business?**

Embracing digital risk management

If single point solutions are not the answer, then how about a holistic approach? Instead of treating every threat type and actor or network anomaly as a separate variable or alert, step back and look at the whole landscape. **Cybersecurity is still not run as a true risk management process. It must be.**

Key Themes

Here come the cybersecurity regulators

Data privacy is only a small part of the picture. Regulators are looking at operational resilience in key sectors like finance – securing the wholesale payments market is a priority and others will follow. They are looking at disclosure and fining the miscreants. **Can you help businesses comply with new regimes?**

Building better Cloud security

Migrating to the cloud is a priority. But, if not properly managed, cloud migrations result in extra complexity and risk. So how can firms efficiently assess cloud readiness, plan and execute migrations and establish comprehensive cloud governance? **Can you help companies transition smoothly and securely to the Cloud?**

AKJ Associates

Developing the next generation of security leaders

If cybersecurity is to change to meet the evolution of our digital world, then so must those who implement it. CISOs cannot cling to an IT paradigm and companies must move away from firing at the first breach. What does a next-gen CISO look like and are you one of them?

Can zero trust be done?

Zero Trust / ZTNA / SASE – they promise solutions to key problems faced by CISOs today. But how realistic are they? Do they take into account existing legacy technology and the ways in which real companies actually do business day-to-day? **Can you explain how a real-world implementation works?**

Why AKJ Associates?

A History of Delivery

For more than 20 years, AKJ Associates has been running been the world's most sophisticated closed-door meeting places for senior cyber-security professionals from government, law enforcement, intelligence and business.

For example, our annual London-based e-Crime Congress is still **the largest invitation-only, Chatham House rules,** gathering of the most senior information risk and security professionals from business and government in the world.

The UK Home Office sponsored the public sector delegation from 40 countries in 2002 and we are delighted to say they still do today.

We have run hundreds of events in the UK, across Europe, the Middle East and Asia, attracting tens of thousands of delegates in cybersecurity, data security and privacy.

These delegates range from C-suite CIOs, CTOs, CROs and C(I)SOs, to heads of enterprise architecture, desktop and network. They encompass all the senior professionals whose input drives security and privacy solution purchase decisions.

And as well as cross-sector events for both private and public sector, we also design and deliver sector-specific conferences for high-value, high-sophistication sectors including the legal sector, financial services and gambling and gaming.

Unrivalled Relationships

Events like this have enabled us to build relationships of trust with **the most influential decision-makers** at the full spectrum of public and private sector organisations in the UK, Europe, Asia and the Middle East.

By providing this audience with valuable insights and business intelligence over the past 20 years, we have built up **the world's most significant community of professionals in cybersecurity.**

We use this to develop new events; to conduct research to understand what cybersecurity professionals are doing, thinking and buying; and to market our conferences and other services.

Smart Lead Generation

We have also developed and trained one of the most effective marketing and telemarketing operations in the cybersecurity space.

Our in-depth knowledge of the marketplace allows us to design marketing outreach that **consistently delivers the best audiences** for the providers of critical cybersecurity infrastructure and solutions.

We connect vendors directly with B2B decision-makers. By combining unrivalled reach, deep knowledge of specialist markets and sophisticated marketing we **engage buyers to deliver real results.**

Delivering your message direct to decision-makers

Plenary Speakers

The e-Crime Congress Series events offer sponsors the opportunity to deliver content in a number of different ways.

Plenary speakers deliver their presentations on the day of the event from a fully featured AV stage to a face-to-face audience.

Their presentations can contain slides, video and audio and speakers can deliver their speeches from the podium or from any point on the stage. Plenary presentations are 20 minutes long and take place in the main event auditorium guaranteeing access to the largest possible audience of cybersecurity professionals on the day.

Presentations are generally designed to be informative, topical and actionable, with the use of case studies and up-to-the-minute references to current developments.

Double-handed talks with clients are also welcomed.

At pre-defined points in the day, attendees will be notified that the main plenary sessions are making way for a series of indepth technical break-outs.

These sessions of up to 30 attendees are held in break-out rooms and delivered live to attendees.

They are an opportunity for vendors to deep-dive into a topical problem, technology or solution in front of a group of cybersecurity professionals who have selfselected as being interested in the topic being discussed.

They are also the ideal venue for solution providers to go into technical detail about their own products and services.

These Seminars run simultaneously, and attendees choose which session to attend.

At the end of the Seminar, attendees are notified that Networking time is now available before the next Plenary session.

https://akjassociates.com/event/france

Your team and your resources available in real-time

Exhibition Booths

Sponsor packages that contain an Exhibition Booth give sponsors the opportunity to be present in the main networking area of the event.

At these booths, sponsor representatives can interact with delegates face-to-face, deliver messaging and technical information via video presentations, demo products using their own BYOD technology and to distribute printed marketing and product information. Sponsors may wish to consider different ways to drive footfall to their booths.

For example, sponsors who have presented in Plenary or in an Education Seminar can close their presentations by directing the audience to their booths.

And there are additional gamification elements available, including sponsorsupplied prizes, that can effectively drive traffic to booths.

Delivering the most senior cybersecurity solution buyers

Our USP? We put buyers and sellers together

We understand that every vendor needs to sell more. That is the bottom line. This is even more necessary in the present situation.

You will have access to the most senior buying audience in the cyber-security market.

AKJ Associates has been building relationships with senior information risk and security professionals for 20 years and our cybersecurity community is the largest of its kind globally.

We know the senior executives who drive strategy from the top, we know the enterprise architects who often control the largest budgets and we know the IT Security Leads and Engineers who so often dictate the purchase process.

All of these job titles attend e-Crime & Cybersecurity Congress events.

Getting access to the right people at the right time always increases the lead generation and always increases profitable sales activity.

Cyber-security

We have a 20-year track record of producing the events cyber-security professionals take seriously

Risk Management

We attract senior risk officers with responsibility for information risk assessment and mitigation

Fraud, Audit, Compliance

We provide the go-to events for fraud prevention and compliance owners at the world's key corporates

Data Protection & privacy

We are a key venue for decision-makers with budget and purchasing authority

We deliver the most focused selling opportunity

e-crime & cybersecurity FRANCE

Delegate Acquisition

- The e-Crime & Cybersecurity Congress has the largest community of genuine cybersecurity stakeholders to invite to our events.
- Our reputation for hosting exceptional events with informative content, excellent networking opportunities and the best vendor partners means delegates know they are attending a quality event, and are willing to give up the time to attend.
- Our delegates are invited by an inhouse delegate liaison team who call senior security and privacy professionals at public and private sector companies with a personal invitation to attend
- We follow up all registrations with further calls, emails on logistics requirements and reminders to ensure the best possible attendance.

Lead Sourcing

- The e-Crime & Cybersecurity Congress prides itself on putting the key cybersecurity buyers and sellers together
- To offer you the best prospects to network with, we don't invite academics, job seekers, consultants, non-sponsoring vendors or marketing service providers to this closed-door event. This attention to quality over quantity has been the hallmark of AKJ's events for 20 years.
- Each of our vendor partners will receive a delegate list at the end of the event.
- Through our targeted networking breaks built into our agendas you will have unrivalled opportunities to network with high-quality prospects with face-to-face networking at the event.

Get Your Message Across

- **Content is king,** which is why the e-Crime & Cybersecurity Congress prides itself on delivering informative and useful content, to attract senior audiences of decision-makers.
- Deliver an exclusive 20-min keynote presentation in the virtual plenary theatre, or host a 30-min targeted workshop session: good content drives leads to your booth, and showcases your company's expertise
- AKJ's in-house content / research team will complement the agenda with best practice from leading experts and senior security professionals from the end-user community
- If you are not presenting, the exhibitor booth offers the opportunity to share white papers and other resources for delegates to takeaway

Exclusivity Delivered

- AKJ Associates has never done trade shows. We see most value in working with a select number of the top vendor partners, and offering those companies the best access to leads.
- Our events keep the same ethos as when we first started 20 years ago, limiting vendor numbers. We will not be a hangar with hundreds of vendors competing for attention. We will keep our events exclusive to give the best networking opportunities.
- All booths offer the same opportunities with the same capacity and functionality regardless of the vendor company.
- This is an opportunity to continue building pipeline and driving leads in partnership with our outstanding 20year reputation and the e-Crime & Cybersecurity Congress brand.

What our sponsors say about us

PhishRod 💐

It was indeed a great show. Despite the situation overall [COVID 19] the number of people that turned up, shows the trust people have of the e-Crime brand. Wish you all the best for the upcoming events and we shall surely be a part of them.

KASPERSKY

This is always a great event for 'taking the temperature' on security issues, to get a feel for people's impressions on current security challenges and to find out what organizations of all kinds are doing.

VMWare Carbon Black

AKJ has been a valuable partner for us for a few years now, enabling us to build relationships and engage with the CISO community in a number of key territories across Europe. The events they hold are a great vehicle for discussing the latest challenges and opportunities in the security sector, and our work with them has delivered way beyond expectations.

Ninety five percent of our exhibitors and sponsors work with us on multiple occasions each year
Our sponsor renewal rate is unrivalled in the marketplace
This is because our sponsors generate real business at our events every year
